

# A new **SCHOOL STREET** is coming to our neighborhood!

## What is a School Street?

School Streets introduce temporary restricted vehicle access to the streets around school entrances creating pedestrian and cycle zones during drop-off and pick-up times.

## Why School Streets?

### School Streets aim to:

- Reduce road danger at the school entrances
- Tackle vehicle congestion
- Improve air quality
- Increase the use of active travel to school

LMST is one of three schools in the HRCE that has been chosen to participate in a School Streets Pilot Project! This project will be co-designed by our community to best meet our school's needs, and we are **looking for 3-4 volunteers to be a part of our Action Team** that will help shape and support our participation in the School Street Pilot tentatively scheduled for this June.

If you are interested in learning more about this opportunity please contact Natalia Diaz-Insense, School Streets Pilot Program Lead, at [ndiazinsense@gmail.com](mailto:ndiazinsense@gmail.com)

Our first meeting will be done virtually on April 12th, 9:30-10:30am
